

## Course Description

The OSHA 30 Hour General Industry Outreach Training course is a comprehensive safety program designed for anyone involved in general industry. Specifically devised for safety directors, foremen, and field supervisors; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1910. General industry workers must receive additional training, when required by OSHA standards, on specific hazards of the job.

### Seat Time>>

This course has been approved for 30 hours.

### Additional Materials>>

You will receive a copy of the NEW 2007 OSHA Standards for General Industry. This book will serve as an invaluable resource for referencing OSHA standards that are covered throughout the course. The book will also aid you in researching standards and regulations that can help you to establish a safer workplace.

### Testing>>

All module quizzes require a score of 70 to proceed forward in the course. The final exam also requires a minimum score of 70 to receive a certification of completion. The final exam may be taken 3 times if necessary.

This course has been reviewed and accepted by OSHA. Upon completion of this course, you will receive a temporary printable certificate. In 4-6 weeks, you will receive a card from OSHA and the Department of Labor in the mail. Laminated cards now available!

## Learning Outcomes

- Describe the functions served by the Occupational Safety and Health Administration and discuss the major provisions of the OSH Act
- Develop an understanding of how the Code of Federal Regulations and OSHA standards are organized to aid in referencing information necessary for the maintenance of a safe working environment
- Locate OSHA standards concerning safety provisions and common citations specific to walking and working surfaces (Subpart D – Walking and Working Surfaces)
- Observe the regulations and standards specific to the use of fire suppression equipment, such as, fire extinguishers (Subpart E – Exit Routes, Emergency Action Plans, and Fire Prevention Plans)
- Grasp the OSHA requirements for the storage, handling, and use of flammable and combustible liquids, compressed gasses, and other hazardous substances (Subpart H – Hazardous Materials)
- Become familiar with the layout and application of OSHA's Hazardous Waste Emergency Response Standard (HAZWOPER)
- Understand the proper use and maintenance of the various types of personal protective equipment (Subpart I – Personal Protective Equipment)
- List and describe the common hazards associated with work in confined spaces (Subpart J – General Environmental Controls)
- Identify the major provisions of OSHA's permit-required confined space standard (Subpart J – General Environmental Controls)
- Know the key components of the lockout/tagout standard and how these components relate to a comprehensive energy control program (Subpart J 1910.147 – The Control of Hazardous Energy – Lockout/Tagout)
- Comprehend OSHA's material handling requirements specific to commercial and industrial vehicles (Subpart N – Materials Handling and Storage)
- Observe the guarding requirements for specific types of machinery and equipment (Subpart O – Machinery and Machine Guarding)
- Recognize the different hazards associated with electricity and electrical equipment (Subpart S – Electrical)
- Define the purpose of the Hazard Communication Standard (HCS) (Subpart Z – Toxic and Hazardous Substances)
